

Men (18 years and older)

Preventive Care Checklist

We're here to help you make your health a priority. To get started, use our preventive care checklists highlighting some of the exams, vaccines and screenings that can help you and your loved ones avoid or minimize potential health problems.¹ No matter how healthy you are today, having a discussion with your doctor about preventive care can make a difference in the long run — for you and the people you care about.

Exams		
Periodic Well Visit with your PCP (schedule at least 2 months in advance)	18 and older	<input type="radio"/>
Vaccines		
Flu Shot (every fall)	18 and older	<input type="radio"/>

¹ The information in these checklists includes recommendations adapted from the following sources as of December 2020 and is subject to change: Preventive services with a rating of A or B from the U.S. Preventive Services Task Force; immunization for children, adolescents and adults recommended by the Centers for Disease Control and Prevention; and preventive care screenings for infants, children, adolescents and women supported by the Health Resources and Services Administration.

² Based on risk factors, and as advised by your doctor.

³ For ages 27 – 45, shared clinical decision-making between member and PCP.

⁴ One-time screening.
