Diabetes and hypertension¹

Preventive Care Checklist

No matter how healthy you are today, having a discussion with your doctor about preventive care can make a difference in the long run — for you and the people you care about. Discuss your checklist with your doctor to develop your own personalized preventive care plan. Your doctor will help you determine which tests and health screenings are best for you based on your age, gender, health status and family history.¹

Screenings		
Alcohol misuse counseling (PCP)	18 and older	<input type="radio"/>
Body mass index (BMI)	18 and older	<input type="radio"/>
Cardiovascular behavioral therapy (PCP) includes blood pressure, diet advice and discussion to lower risk for heart attacks and stroke	18 and older	<input type="radio"/>
